

METHOD OF TEACHING

Buxoro davlat pedagogika instituti o'qituvchisi

Saidova Zakira Tolibovna

Buxoro davlat pedagogika instituti talabasi

Nuriddinova Xursandoy Zoyirovna

Annotatsiya: Metod-o'qitish davomida yuqori natijaga erishishning samarali usullaridan biri. Ta'lim berish yoki ta'lim olish jarayonida metodika bizga juda foydali hisoblanadi. Ular juda xilma-xil. Ammo, o'quvchilar, bog'cha bolalari va talabalar iqtidori, yoshi va qiziqishiga qarab tanlangan metodikaning hayotga tadbir etilishi juda oson va qulay bo'ladi.

Kalit so'zlar: metod, zamonaviy, muhokama

Annotation: Method - is one of the most effective ways to achieve high results during training. The methodology is very useful for us in the teaching or learning process. They are very diverse. However, it will be very easy and convenient to apply the method selected according to the talent, age and interest of students or kindergarten children.

The key words: method, modern, discussion

Аннотация: Метод – это один из наиболее эффективных способов достижения высоких результатов во время тренировок. Методика очень полезна для нас в процессе преподавания или обучения. Они очень разнообразны. Однако применить метод, выбранный с учетом таланта, возраста и интересов школьников или воспитанников детского сада, будет очень легко и удобно.

Ключевые слова: метод, современность, дискуссия.

Nowadays, importance of learning English is much higher than before. It is said that, many English language experts are implementing new methods and way of learning. This will certainly increase the effectiveness of teaching foreign languages. There are many advantages of teaching students and pupils with special methods, game and experiences.

In fact, methods can help to understand topic, experience. There are many of them. For instance, discussion method, question and answer method, team teaching, memorization method and so on.

It should be said that the use of these methods in educational processes or during the lesson at school is the same term. These methods help pupils and students to acquire certain knowledge within the field of science. In addition to these, many of methods bring out some talents of pupils and students. For example, many students may be shy to explain their opinion and although they know something about topics, they cannot express their views. The main way to find out their opinion openly is to use some games and methods.

One of the most useful and engrossing methods is a discussion method. In this method, teacher should give a topic for class and ask all of their opinions about this topic. Class should work together. Because that is better than work individually. They try to work sticking together, and it is useful for those who are shy to overcome shyness. Also, it helps to develop students with various skills and abilities.

In most cases, question and answer method is a very convenient and easy way to elicit student learning and conclusions. Because teacher ask a question student need to remember the topic. Students try to give an answer or examples. For this, they try to find examples by searching their minds and repeat the topic. So this method is very useful for the subject to be remembered longer.

Also, it will be useful if we use modern technologies together with methods during teaching. Because, for some methods to be effective, the role of computer, television and similar technology is incomparable.

To sum up, I would like to say that, especially different methods are a very good way to get students interested in the lesson. Because, in order to learn the topic, it is advisable to try and to experience it first.
