and Technology Academic Lyceum*

**Abstract:** In this article, modern teaching of English in primary grades approaches and innovations as a result of the use of methods, of students development of logical thinking skills, fluency of speech, quick and correct answer formation of teaching skills, enthusiasm for knowledge, thorough preparation for classes information about what they want to see.

**Keywords:** modern, innovation, elementary, game, educational, education, bingo, technology.

Learning English is one of the main conditions of today's development.

Therefore, not only increasing the interest in this science among the young generation, rather, it is up to parents to encourage their research in this direction pedagogues are also responsible. A modern beginning

This is one of the most important and positive changes in education

The First President of the Republic of Uzbekistan on December 10, 2012 on measures to further improve the language learning system" PQ- Resolution No. 1875. Based on this decision, foreign languages, mainly English learning game-style lessons from the 1st grades of general secondary schools and in the form of oral speech lessons, and from the 2nd grade, alphabet, reading and

Grammar teaching begins step by step. According to the decision, foreign languages

The culture of welcoming children's first acquaintance with a foreign language, they started learning colors and everyday words in the form of a dialogue. No doubt, modern information communication in foreign language classrooms in educational institutions of our country with technologies and advanced technical means of teaching equipment, teaching foreign languages to children and teenagers on television and radio channels broadcasting, history and culture of other countries, scientific and popular magazine devoted to world science and technical news regular feature and multi-part films with Uzbek subtitles demonstration to our youth of the

peoples of the world past, culture, science made it possible to get to know him closely.

Using game technologies in education, is one of the most effective tools. Their thinking during the game, worldview, thinking expands. Scientists approach education through play believed that it facilitates the educational process. Not only does it make it easier, but it increases interest in science and encourages the child to acquire deep knowledge. Game style lessons help children develop oral speech. First class students really like different views with pictures or videos. Various

Through colorful pictures, regular games in developing their speech should be used. For example, What is this?, Who is this?, Who knows the most words? such as games can be used. Remembering children's words during the game it is necessary to encourage them to stay, depending on their correct pronunciation.

Depending on the increase in wealth, different types of games, different competitions organization is also important. "Names of Fruits" for children first,

Exercises on topics such as "Professions", "Home appliances" with the help of games can be done. Then they match the colorful images on the computer if it is shown in the situation, the students' speech develops and their attitude to the environment the range expands. At the stage of displaying a new topic, words and pictures showing it will appear. Pupils listen to the words and read them they will be able to pronounce. Present the topic using a computer it is necessary to pay attention to the principle of individualization of education. Some students perceive the graphic image of the word, and some of them receive the sound image they face difficulties.

It is known that foreign languages have been taught in the public education system of our country in recent years a new era has begun, requirements and methodology have changed. It is an advanced pedagogy the use of technologies, interactive, innovative methods is required.

This is confirmed by the fact that English is taught in schools from the 1st grade.

To increase the interest of children who are hungry for knowledge in language learning, bringing them into the rich world of English requires a lot of work from teachers is enough. Of course, in this regard, the organization of classes based on various interactive games increases their enthusiasm, activates passive students in the classroom creates an atmosphere of mutual team spirit as well as competition among students.

**DICTIONARY?** a picture most English learners know drawing game. For this game, you can use a regular board or a white magnetic board we use We will divide the class into two groups and for each team

We draw a table on one side of the board and collect the scores of the teams we will write down the scores here, the groups will choose a name for themselves.

Then one student from each group went up to the blackboard and turned upside down chooses one of the words and draws it on the board, and the others show it finds The first team to find the word gets a point.

**OBJECTS?** – this we will check students' memory and vocabulary through an interesting game. The more we increase our vocabulary, the better our English speaking skills it just keeps getting better. Conditions of the game: on the board and in the classroom we use 15 items located. Table all items put on it, call all the students and look at the objects on the table we say that they are sorry, and then cover all the items with something we close Then write the 15 items that the students remember on paper or we ask them to write in English in their notebooks. After 2-3 minutes the teacher writes the names of objects on the board, and the students themselves checks the names of items written. He wrote the most correctly the student is considered the winner.

**BACK TO BACK?** — this game sharpens the student's memory and hearing increases the ability. With the left side of the colorful pictures on the table let's go out, we will take two students to the board and one of them we ask them to choose the pictures without showing them to the second student they sit on two chairs facing each other. A boy holding a picture Riddle says what is described in it, and the second student he writes down the words he hears. He conveys what he hears clearly and clearly the student will be the winner. This game is also great fun for seniors.

**BINGO?** - it is necessary to prepare a little to play this game will come. But it is very interesting. Make 4x4 bingo cards and write words in each box and distribute to students. Words that there are no repeats and that there are readers when you read them should be defined. He was the first to mark all the words on the page the student is considered the winner.

In conclusion, the commitment to teaching language to elementary school students not as, but on the contrary, he used interesting games and innovative methods is a foundation for the knowledge they will get in the future can serve. Therefore, the educational system is also free-thinking,

In the future, we will make it our mission to raise a mature person ways of effective use of innovative technologies by future teachers

We can contribute with further development.
