

ELECTRONIC STUDY BOOKS TO CREATE ANALYSIS TO DO

*Andijan mechanical building institute Information systems and technologies
department intern teacher **Sultanova Dildora Ilhomjon daughter**
Andijan mechanical building institute Information systems and technologies
direction 3rd stage student **Bakhromov Fazliddin Lutpiddin son***

Annotation . *Electronic study literature in creating education process for individualization enable gives , training process own himself control to do and observation opportunity gives , har different optimal solution in cases acceptance to do teaches , it is known type thought to keep develops knowledge get culture forms . Electronic study literature apply and Create problems learning main is considered*

Key word . *multimedia, electronic literature , electronic textbook , remote*

Current at the time of education promising models , new information from technologies wide in the lake to use is based on Education in this supports electron of means one has been electron study books important important have Electronic study books education process individualization enable gives , errors diagnosis and reverse contact with control does , study process own himself control to do and observation opportunity gives , har different optimal solution in cases acceptance to do teaches , it is known type thought to keep develops knowledge get culture forms . Electronic study literature apply and Create problems learning main is considered The only national one in this field methodical supply and standards work not released , this while own in turn electron study books to quality negative effect shows . We know present information technologies century electron study literature creation young people not only young people all people for very big important have considered is coming Because , social from networks easily looked for literature to find can Past in centuries book reading for to libraries went and looking for the book get for while someone by reading completion waiting for in turn stand up was This means how much the time lost means Current in time while such to problems face to arrive difficult Even money sum up buy a book too can't all to himself necessary has been literature social from networks easily download use can

Current in the day even remotely in our republic teaching methodical materials some traditions in teaching is being used and good results is giving Electronic libraries , electronic study manuals , online textbooks to the model is entering Multimedia training manual in itself many information incarnation with together , this information on the screen demonstration is enough , and sound using explains . Multimedia training of the manual feature , it is an event and information obvious reflection makes That is,

a multimedia event and information vitalizes . This is text , video , sound and music using done is increased .

in the republic on the development of information technology tools for the use of electronic educational literature , as well as on the organization of distance learning. The scientific and methodological aspects of creating electronic literature are being researched by many scientists . Since 2006, despite the beginning of the third stage of the use of e - learning literature, the work on creating e - learning manuals for educational institutions and their use in the educational process is still ongoing. is decreasing . This is due to the fact that the methodology of creating an electronic training manual, its structure, and the components it includes are not put into a specific system. One of the urgent tasks of the present day is the development of a new generation of educational literature and the acceleration of the provision of educational institutions in the transition to the third stage of the wide use of electronic educational literature in the educational process . No matter where we go, be it a university or a school, there are electronic desks in all classrooms. Modern education in the process our pedagogues electron from textbooks wide is being useful .

an e - learning guide depends on the talent and skill of the author

being each how complicated systems Create he likes the opportunity . He certainly is

good equipped , el e m e nts in order is located should be .

Electronic study manual study of the material complete to be education in the process from him use and on paper study to the material appeal not to do provides . In the text different expressions and to definitions to tables , graphs sender hypertexts because of electron study manual paper to materials than study in the process comfortable opportunities creates With that together his compactness and cheapness education of the recipient or user from attention case it won't be .
