and Technology Academic Lyceum*

Abstract: This article contains many definitions of education, but simplified

In other words, education is the imparting of general knowledge, the ability to think and reason is the process or actions of formation and direct learning in general.

Key words: educational system, ability to think, effective planning of your life, the role of education in human life.

As you know, success breeds success. Never neglect education cannot be left out because education is the heart of any society. People with quality education reforms leading to economic, social and political growth and development of society able to improve society through implementation. Education is the world around you opens your mind to better understanding. Being in different parts of the world through education one can learn about the different cultures and events that take place. Our horizons through education is expanding so that we are not only with what is happening in our countries we will be limited to what is happening around the world we will stay Education helps you to be confident in life. Own when you get an education

Educated people make decisions that can change lives in a positive way have the opportunity because they have a lot of experience while learning new things every day

The importance of education is evident in developed countries, because it plays a major role in personal and social development. Education poverty, oppression and war used as a means of relief, because the leaders brought the country to development has the knowledge to go. In some countries, people are concerned one of the problems was overpopulation.

What is the expression of human education? Along with education, centuries ago

multi-faceted experience accumulated by generations is accepted and as a result own in turn, the way to tomorrow will be opened. Thus, the place of education in

human life it is impossible to overestimate, this is a kind of intersection - living in the present, the past wisdom is used for future realization.

According to experts, people who have a good education in their youth in old age they suffer from mental retardation, mental illness and Alzheimer's disease.

The main stages of human education. During each person's life, birth from childhood to old age, education goes a long way - first known knowledge and acquires skills, then strengthens them and new things for himself does not stop developing and learning. People need knowledge and education not only in school on the bench, to the phrase "science of life", which has already become a catchphrase it is enough to pay attention - it is necessary to deal with the most intelligent teachers. In addition, human education all steps look like this.

1. The beginning of education - when a person learns everything in infancy, i.e. takes when talking from scratch. A more complex science in the future, knowing the world around absorbs everything that needs to be built,

2. Primary education - upbringing at home or in kindergarten, when the child is taught the first rules of behavior, the simplest concepts, writing and the ground for learning to count is prepared for him in an understandable form;

3. School education - laying the foundation of education, awakening interest in knowledge, pique his interest. In the process of teaching at school, the child learns other cultures, history is acquainted with, understands the real dimensions of the world and the knowledge accumulated in it,

4. Higher education - continues school, only in a slightly different framework: teaching is narrow is carried out in the framework and tends to choose a future profession. At this stage, young people prepare to meet adults,

5. Practical education is a job almost like a university, only for practical people place, people acquire practical knowledge and skills, which quickly turn into experience,

6. Self-discipline - This is a variety provided by everyday situations prior knowledge from materials and resources, books and the Internet to science improvement process.

In the process of professional formation of a teacher after graduation the school leadership, especially the academic director, and the pedagogical community play a major role.

Attaching experienced teachers to young teachers, observing their lessons, involvement in methodological work is one of the main tasks of the school management. The teacher himself along with gradually mastering the profession,

pedagogical knowledge among parents promotes. In this way, professional formation will improve. Teaching

It is up to the young teacher to master the profession and pedagogical skills, to enter the school teaching team and find his place in it. Face the support of the team not turning away, not losing heart when faced with difficulties, being able to see one's mistakes and he working to eliminate it indicates his formation as a teacher. That is it

At the same time, the professional formation of the teacher is to educate oneself, constantly on oneself.

It depends on working and improving your skills in time. All these are professional considered an integral part of qualities.

For successful work, each teacher has high pedagogical skills and a wide range of skills must have a worldview. Only then, with a little effort, he will achieve a great result. Creativity will always be his partner. Talented people can only do pedagogical work may have pedagogical skills. A competent, experienced teacher can put himself in the place of the student, he can teach adults something that is clear and understandable is difficult and abstract for students to understand works on the basis that it can be. Therefore, it is the character of the statement, thinks out, and plans the form separately.

The current period demands advanced pedagogical technology from the teacher understanding, initiative, awareness of news in their subject and to their lessons requires introduction. A successful solution to the problem of establishing cooperation between teachers and students, creating a friendly environment in the educational process knowledge, skills and qualifications of science teachers and school management depends on the level of acquisition of personal human qualities.

The teacher first:

- Soft-hearted, open-faced, sweet-talking, loves children as they are love;
- Shares affection, pride of heart to students, is friendly in the classroom creating an environment and motivating students to develop learning motivations understand that methods;
- A deep feeling of being responsible for the fate, happiness and future of students, respecting their personality and dignity;
- Not to be rude to students in any pedagogical situation, to insult and it is necessary to refrain from shouting, threats and threats;

- Ability to understand students, appreciate their feelings, concerns, it helps to overcome suffering, it is unique in youth and psychological development know the characteristics, interests, needs.

Fair and democratization of the education system in our country discovers a special demand for the educational process and special pedagogical relations. This is the process the content is fundamentally different from the previous one.

Application of advanced pedagogical technologies to the educational process, educational efficiency able to think creatively and independently by increasing, implementing scientific achievements into practice the task of raising socially active and highly moral young people is of great importance.
