

USE OF NEW PEDAGOGICAL TECHNOLOGY IN FOREIGN LANGUAGE TEACHING

*Boqiyeva Marjona Shuhratovna,
English teacher of Bukhara Institute of Engineering
and Technology Academic Lyceum*

Abstract: This article provides information about the methodology of foreign language teaching, its development as a science and the methods used in the teaching methodology. In addition, modern methods necessary for excellent teaching and learning of foreign language in our country and the important of their wide use are highlighted.

Key words: Foreign language, skills, qualification, methodology, innovation, educational process.

Nowadays, getting education and learning foreign languages has become the demand of the time, that is, there is a proverb among our people, "He who knows the language, knows what he knows." Today, various modern innovations are used in teaching foreign languages. It is a road map of culture. It tells you where its people came from and where they are going. Innovation means "introduction, distribution of newness" in English. The psychological aspect of innovation was developed by the American researcher E. Frodgers. Learning is one of the most important areas in the human society, that is, in our time when international relations are on the rise, knowledge of languages, especially multilingualism, is of great importance. Nowadays, the study of various foreign languages has become so strong that from kindergarten age to adult specialists learns foreign languages They are trying to learn. This is a positive situation, because learning foreign languages opens doors for personal interests as well as learning about the culture, history and customs of the countries that speak that language. Knowledge of two languages opens all the doors on your path. They mainly learn 3 different types of languages, i.e. they are the following: mother tongue, second language and foreign language.

The mother tongue is a sound that has been ingrained in our blood, inherited from our ancestors, and has been ringing in our ears since birth. We can learn our sister languages. Foreign languages are foreign languages, such as European and similar languages. The process of teaching three languages is different. Language is learned in an artificial environment. Learning and teaching foreign languages largely

depends on the theoretical development of foreign language teaching methodology issues and the creative application of theory in practice. The importance of advanced modern technologies is incomparable. The use of technological tools in the educational process plays an incomparable role in mastering and strengthening each section of learning foreign languages. For example: it is difficult to imagine the formation of listening comprehension skills without computers and players. Listening comprehension is one of the most important parts of language learning. At the same time, the student learns grammatical skills, pronunciation, how rich the vocabulary is, and the meaning of words. Because in today's globalization process, language learning has risen to the 1st level, and obtaining foreign certificates and studying in foreign universities has become very popular. Learning another language is not only learning different words for the same things. 'Learning' is learning a different way of thinking about things.

Based on the above points, it can be concluded that each innovative technology has several advantages. During the period of learning foreign languages, several innovations and favorable conditions have been created for young students. During the period of learning foreign languages, the use of innovative methods for young students. It helps to increase the logical and creative thinking of the students, to answer questions quickly and correctly. This motivates the students to learn new foreign languages faster. People always try to engage in activities that are interesting and enjoyable for them, and they don't even notice how quickly time passes. If a new language is learned with strong interest and enthusiasm, then the goal is faster and easier can be reached.
